

Themed Gardens

Need a little inspiration deciding what you'd like to grow? The gardens show here, created by a professional chef, are suggestions of collections of plants suitable for several different culinary styles. If one or more is a fit for your lifestyle, it may be useful in helping you decide what to grow. These gardens are also available as pre-designed 4' square planting plans that you can purchase from Verdura or ask us to incorporate into your garden design. For more information on purchasing pre-designed themed gardens, email us at caroline@verduragardens.com.
